On April 14th, 2024, Daphne Barak underwent a breast cancer removal operation. In the ensuing one-year-long intense chemotherapy session, she fully recovered.

Erbil Gunasti also went through a life-saving emergency operation in the same 24 hours.

These two miraculous operations at the University of California, San Diego inadvertently became an impetus for the founding of this 501 © (3).

Prof. Anne Wallace, Director of Comprehensive Breast Health Center, and Chief Surgeon Bryan Clary simultaneously operated on the founders.

Ever since they became an integral part of Starry Starry Night Gala dinners, with a contingent of doctors and staff from UC San Diego Health.
